

For more than 25 years, Jean-Luc Aegerter and his son Paul, who joined him in the adventure in 2001, have been making fine, balanced Burgundy wines. With their love of their craft and their expertise their goal is to produce wines that respect their terroir to the full. From regional appellations to grand cru vintages, Maison Aegerter offers nearly 40 appellations from 50 hectares of vineyards.

Les Grands Classiques

Stylish wines, stylish bottles

Les Grand Classiques or the essential Burgundy wines...

A reflection of their terroir, the village appellations and premier cru villages from this range are revealed. Their authenticity and their assertive character are renewed crop after crop thanks to a deep respect for the ancestral Burgundian expertise.

CHABLIS Vieilles Vignes

A few words on the appellation...

A village appellation of the vineyards of Chablis, Chablis Vieilles Vignes only makes white wines. The vines, planted on calcareous soils give it the typical mineral and iodised notes that give this Chablis its unique, distinctive personality.

100% Chardonnay

After being harvested by hand, the grapes are destalked and then pressed ready for vinification in new 500 litre oak barrels. The wines are then aged for 6 to 12 months in barrels that have seen two previous vintages.

Under its clear, pale gold robe, this wine expresses a fresh, lively and mineral nose: flint, green apple, lemon, with lime, mint and acacia notes. Age makes it a little more golden and spicy. On the palate, it has a beautiful attack and aromas that keep their freshness. It is a Chablis with a long finish; it is dry, with perfect finesse.

This Chablis is the ideal companion for fish or poultry terrines, or grilled or poached fish. It is perfect with asparagus and delicious with curries of all kinds and tandoori dishes. Of course, it is simply magnificent as an aperitif or with cheeses, where it marries particularly well with goat's cheese, Beaufort, Comté and Emmental.

Serve between 10 and 11°C. Best appreciated young (2-3 years).
